

## Pope Has Horns on 'Time' Cover

This will be just a very brief video. As I've been saying over and over again, God is warning us! God is warning us! God is warning us! Are you paying attention?! Let's take a look at the picture of Pope Francis on the cover of Time Magazine because they showed him with two horns. And, as you know, in the Book of Revelation, the beast that comes up out of the earth with two horns symbolizes the False Prophet. Is that what the editors in Time Magazine are trying to tell us?

Now, he's not the only one: Miley Cyrus wore two horns in her infamous 'twerking' video,

the elevator man in 'Gangnam Style' wore two horns, and all three of these are images of the False Prophet. In the 'twerking' video, and twerking is a imitation of animal sex, the two beasts, Miley Cyrus and the other man who was dressed in black and white, he symbolized the Antichrist, she symbolized the False Prophet. In 'Gangnam Style,' the elevator man, he has two horns and of course, Psy symbolized the

Antichrist, and this was also indicating animal sex between the two beasts.

Let's take a little closer look at Pope Francis, because this is really rather disturbing. Now, the editors of Time have done this before. The two points of the "M" indicate two horns, and they're trying to give a demonic image of Pope Francis, but do they recognize that they are also portraying the False Prophet? Now, I'm not saying Pope Francis is the False Prophet because nobody considers Time Magazine to be an expert on the End Times. On the other hand, we do know that the False Prophet and the Antichrist are almost upon us. And we do know we have to be prepared, ***'to wash our robes and make them white in the blood of the Lamb.'***
