

## **Obama: The US does not Torture Except for Abortion**

On this new program I would like to comment about Barack Obama's speech to the nation last night, in which he said that America does not torture.

I beg to disagree with you Mr President, because America does torture 3,000 babies to death every day in this country. Have you ever seen what happens to a baby that suffers through a suction abortion, where the doctor inserts a tube into a mother and sucks the baby's parts out part by part? Have you ever seen a saline abortion, where the baby is burned to death from a caustic acid solution which is inserted into the mother? These babies are called 'candy apple' babies, because the torture is so terrific.

And how about partial birth abortion? which I know you and your Democrat colleagues support. With partial birth abortion, the baby is almost born, except for the head, and the doctor inserts a scissors into the brain and sucks the brain out. All of these babies feel torture. All you need to feel pain is to have nerve receptors in your body, and all of these babies who are aborted feel the pain. And one more thing President Obama: Are you aware that African-American babies are aborted at a rate double that of other babies?

Abortion in America is truly black genocide. Are you aware that Planned Parenthood sets all their abortion clinics, or most of them, in poorer neighbourhoods? Planned Parenthood is a racist organization and they support you President Obama. Now let me say I support your economic policies. I thought you gave a great speech, as far as that goes, but you should remember what Mother Teresa said. Abortion is a great poverty.

There's no doubt that God would rather see every American poor, than to see one baby aborted. So in conclusion President Obama, let me say this one more thing, America will continue to torture babies every day, until you shut down Planned Parenthood. I think it's great your shutting down Guantanamo, but the real terrorists are operating in this country. The real torture is going on every day in America. That's the torture that you have to stop.

So all I'm asking you President Obama, is don't forget the babies. Don't claim that the United States does not torture. Those babies are in heaven right now, and according to Saint John in the book of Revelation, they are asking God for vengeance and God will grant them vengeance on America.
